

ECONOMICS

Economics provides students with the skills necessary to understand real world issues and to better evaluate individual and group behavior in the context of global scarcity. Professors do so by actively involving students in the learning process, challenging them to explore questions on a variety of contemporary problems and policies while applying the tools of economic analysis.

Our seven full-time faculty members are united in the belief that students must develop the ability to use logic to solve problems analytically, draw inference from quantitative and qualitative data, pose their own questions, and learn to communicate clearly in speech and writing. Our flexible Economics degree enables students to design a curriculum around their interests and future goals. It serves students well, whether their goal is a graduate degree in Economics, Finance, Public Policy, Business, a law degree or a career in industry, financial markets, the nonprofit sector or public policy.

RESEARCH OPPORTUNITIES

Stonehill Undergraduate Research Experience

This is an opportunity for students who have completed their first year at Stonehill to perform significant, publishable, full-time research under the guidance of and in collaboration with an experienced faculty researcher.

Recent projects

Economics major Joanna Zecha '14 worked with Linzy Brekke-Aloise, associate professor of History, on "Quantifying Early American Consumer Culture: Wardrobes and Wealth in Three Massachusetts Counties, 1780-1840."

Economics major Paul Fazio '14 worked with Sean Mulholland, associate professor of Economics, on "Private Unions, Public Unions, and Income Inequality."
